No. 28 Ben Gong West 3rd Rd., Ben Chou Industrial Park,
Kangshan Dist., Kaohsiung City 820110, Taiwan

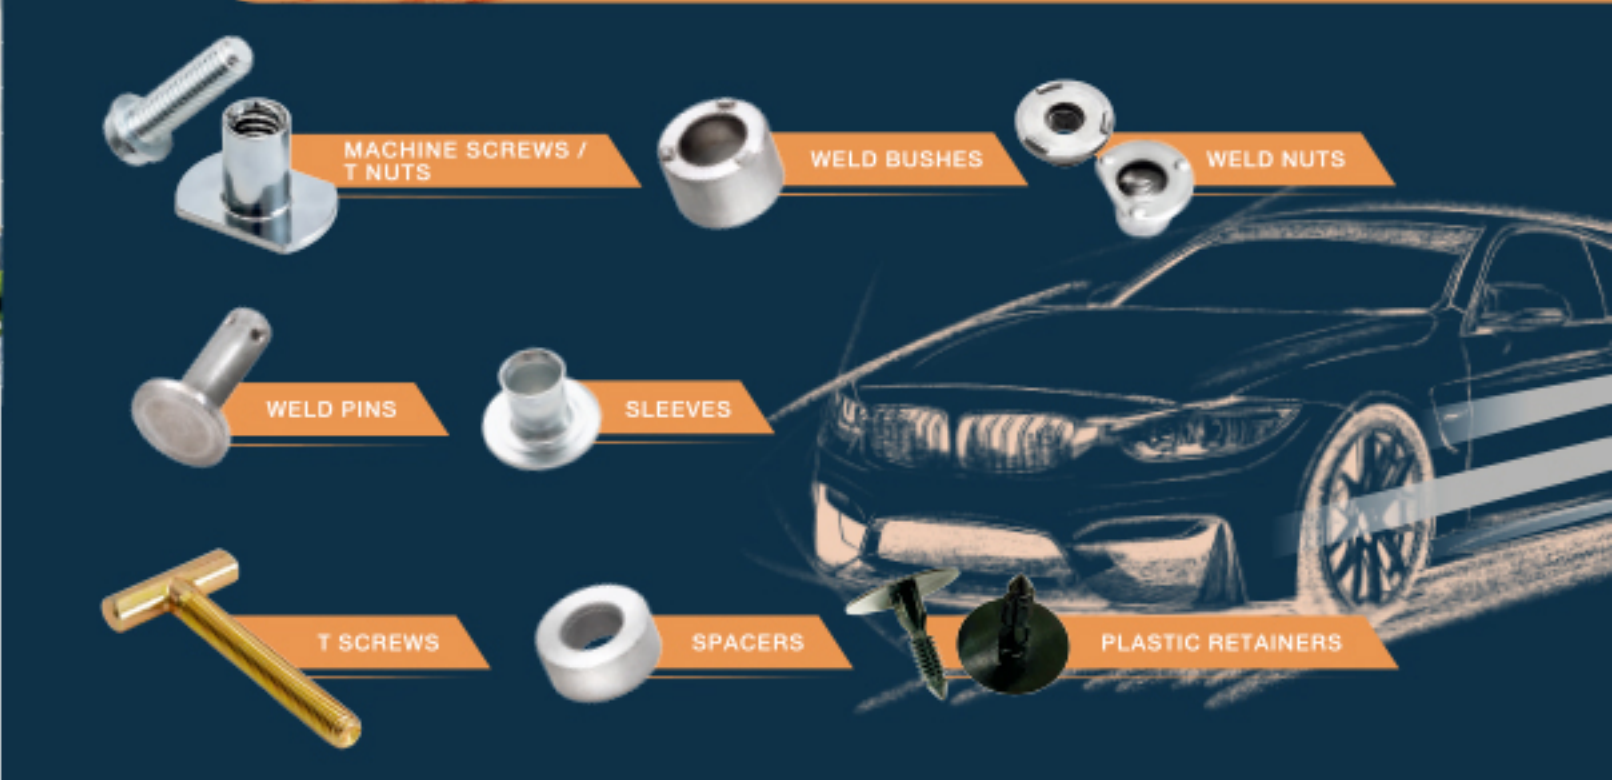

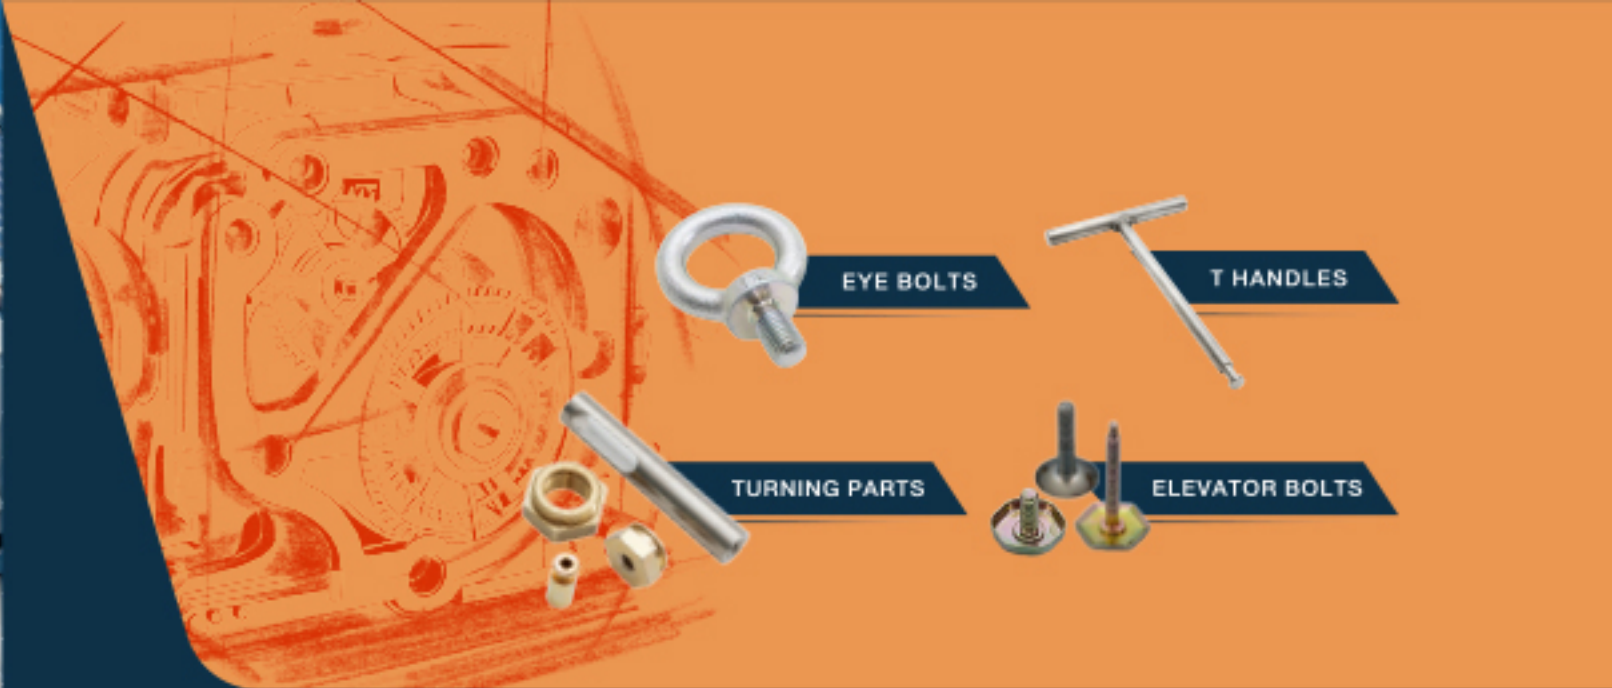

PRODUCTS

Lug Nuts
Spring Nuts
Welding Nuts
Threaded Rods

Chipboard Screws
Drywall Screws
Machine Screws
Self-Drilling Screws

Tapping Screws
Weld Screws
Carriage Bolts
Eye Bolts

Closed Dies Parts
Turning Parts
Stamping Parts
Welding Bushings

1998
Established a trading company to provide export services

2008
Set up a factory in Gangshan District, Kaohsiung City

2009
Obtained ISO/IATF16949 automotive fastener production certificate

2019
Received ISO 14000 Green Factory certification

2021
Implemented TIP BIU-BI data collection and analysis

About E Chain Industrial Co., Ltd.

Founded in 1998, E Chain Industrial Co., Ltd. specializes in the export of screws, nuts, and hardware through its international trade arm, Superior Quality Fastener Co., Ltd. Serving markets in the U.S., Europe, and beyond, we are dedicated to providing the highest quality customized services, continuously innovating to create value and trust for our customers.

Factory Environment and Features

Our production line features advanced equipment, including multi-station bolt formers, nut formers, threaded tapping machines, and automatic drilling machines. For quality control, we use precision instruments like Shimadzu tensile testers, micro hardness testers, 2.5D projectors, salt spray testers and sorting machine to ensure high accuracy and quality.

Inspection Equipment

- Shimadzu Universal tensile testing machine
- Shimadzu Precision micro hardness machine
- Buehler Automatic embedding machine
- Olympus Metallurgical microscope
- Salt water spray testing machine
- Keyence image measuring instrument
- 2.5D image measuring instrument
- Concentric
- Surface roughness meter
- Fisher Coating thickness gauge

International Certifications, Building Excellence in Quality Management

Product Features

Through continuous technical upgrades and optimized manufacturing processes, we enhance product quality and performance. In response to the rise of electric vehicles, we developed high-strength 6082 aluminum products, reducing weight and increasing vehicle stability and safety, supporting efficient EV operation.

Standard Specifications / Customized Screw Caps and Fasteners

We offer professional R&D and manufacturing of fasteners, focusing on every detail from design to production. Our promise is to provide the highest quality products at competitive prices. Serving major brands in the U.S. and Europe, we develop lightweight aluminum fasteners to meet the demands of electric vehicles, offering superior strength and stability compared to traditional carbon steel.

Max. Outside Diameter: 6-34mm
Length: 16mm-300mm

forging system and Keyence projection measurement equipment for precision and efficiency.

Competitive Advantages

Our experienced technical team continuously innovates to meet market demands, optimizing manufacturing processes for maximum efficiency and quality. We provide prompt service and solutions, earning strong customer trust and delivering the best solutions for added value and mutual success.

Technical Excellence

Our quality policy focuses on pursuing excellence, thorough investigation, solution-seeking, and continuous improvement. In 2008, we established a production facility in Gangshan, specializing in custom products and automotive parts. We maintain international standards with ISO 9000, IATF 16949, and ISO 14001 certifications. Committed to ESG principles, we emphasize energy efficiency, carbon reduction, and environmental responsibility. In 2023, we enhanced our capabilities with a 6-station quick-change cold
